

durable high performance labels
for electronic, automotive, industrial, medical applications

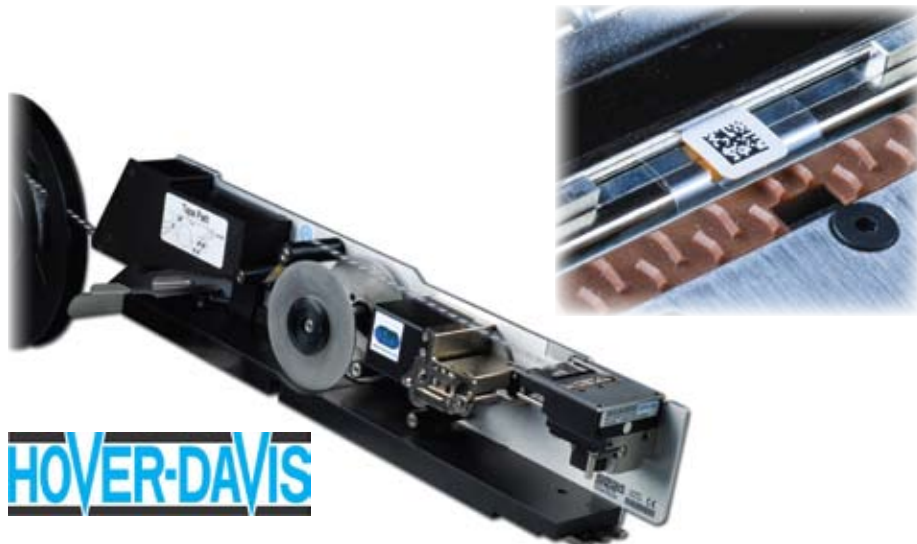

Pre-Printed Label Presenters

IDENTCO & Hover-Davis Team Up

Earning the reputation as “the best auto-apply label converter” in the marketplace, IDENTCO leads the industry by providing innovative automation solutions. These skillfully engineered remedies combine the appropriate label material, liner and ribbon combination to meet or exceed labeling requirements. IDENTCO also helps customers optimize their investment in automation technologies by the precision die-cutting of a wide variety of materials.

Combining IDENTCO’s industry expertise with a Hover-Davis custom component delivery system provides additional value to manufacturers seeking to perfect labeling operations and control data delivery through labeling.

Highlights

- Innovative Automation Solutions
- Skillful Industry Specialists
- Cost Effective Remedies
 - Increase Labeling Accuracy and Speed
 - Waste Reduction through Precision Die-Cutting

Features

- Dust Free Cores
- “Quick Release” Liners
- 600dpi Print Resolutions
- LPS Series Presenters for:
 - *Assembleon*
 - *Universal*
 - *Panasonic*
 - *Siemens*
 - *Juki*
 - *Fuji*
 - *Samsung*
 - *Yamaha*

Auto-Apply Labels

Labels for Automatic Application

As an industry leader, IDENTCO understands that high speed automatic application equipment requires a precisely manufactured part that contributes to static free assembly. With nearly 25 years experience, IDENTCO can design and produce die cut parts for all major auto-apply machines. To eliminate damaging static buildup in the production area, IDENTCO created the REEL-e™.

The REEL-e™ improves label/die cut part spools for feeders and auto-apply machines. These recyclable and 100% RoHS compliant reels are made from an electro-static dissipative plastic material that aids in the elimination of static build-up. The reels now allow increased flexibility during production to ensure that the final product will meet all specifications.

Highlights

- Available for Wide Array of Automation Systems
- Perfect for Static Reduction

Features

- Precision Die Cutting
- Quick Release Film Liners
 - Anti-static Dissipative
 - Dust-free
- Reel-e™
 - Robust Design
 - Anti-static Dissipative

Quality Endorsements

- RoHS Compliant
- ISO Certified
