Die cut parts

Functional Adhesive Products

IDENTCO manufactures precision die cut adhesive parts for a wide variety of applications for the Electronic, Automotive, Medical and Industrial markets. Employing high tolerance tooling and specialized release liners, IDENTCO can assure parts designed for auto apply will work every time.

For special needs, IDENTCO's state of the art *Materials Design and Testing Laboratory*, can formulate unique constructions that meet performance requirements at an economical price. Whether the application requires bonding, masking, sealing or gasketing IDENTCO has the expertise to design and produce products that meet exacting specifications.

Highlights

- High Tolerance Tooling
- Specialized Release Liners
- Unique Constructions

Features

- Lenses
- Insulators and Shields
- Masking
- Gaskets

Quality Endorsements

- RoHS Compliant (when specified)
- ISO Certified

Circuit Board Protection

Polyimide Masking Material

IDENTCO's removable Polyimide masking materials fit in many applications. They provide optimal protection of gold fingers during wave soldering of printed circuit boards. Another use masks circuit boards during conformal coating. Masks can reinforce splices on rolls of flexible circuits during roll process as they go thru plating, etching and soldering stages.

In the manufacturing process, the Polyimide masking materials allow clean removal of silicone adhesive after exposure to temperatures up to 500°F (260°C). Thin and flexible substrate lets the mask conform and protect uneven surfaces such as high temperature powder coating applications.

Highlights

- Outstanding Resistance to Fluxes, Cleaners and Solvents
- Excellent Insulation Properties
- Exceptional Conforming Capabilities
- Clean Silicone Adhesives Removal

Features

- Gold Finger Protection
- Masks Conformal Coating
- Masks and Protects Uneven Surfaces
- Reinforce Splices

Quality Endorsements

- UL/CSA
- RoHS Compliant
- ISO Certified
