

WIRE & CABLE IDENTIFICATION LABELS

TTL™ 200 SERIES

HIGHLIGHTS

- Excellent product conformity
- Unique “site-hole” technology
- **UL approved***

FEATURES

- Thermal transfer printable
- Self-laminating vinyl film
- Custom sizes, colors, and formats

Designed for cable and wire identification, the TTL™ 200 Series also works on other surfaces requiring conformability. IDENTCO unique “site-hole” technology allows virtually any thermal transfer printer to print clear self-laminating labels accurately with minimal waste.

IDENTCO wire and cable labels have been thoroughly tested and qualified to match the TTRR™-A ribbon.

Combining the wire and cable labels with the TTRR™-A ribbon promises optimal print quality, **UL recognition** and lifelong product labels.

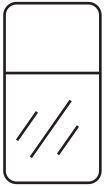

***UL recognition is contingent upon printing with the appropriate IDENTCO material and TTRR™ ribbon combination as specified by Underwriters Laboratories testing.**
